

GLORY

## USF-50 Series

Banknote sorter

The USF-50 Series banknote sorter combines speed and accuracy to transform the efficiency of your back office cash processing operations. High-performance sensors for fitness sorting, class-leading counterfeit detection and speeds up to 720 notes per minute will dramatically increase the productivity of your staff.

## A compact banknote sorter, the USF-50 Series is suitable for any desktop location, allowing extensive fitness sorting processes even in your smallest branches.

### Glory advanced banknote scanning technologies

- Double image line sensors – a high resolution, extra long sensor clearly scans the full image of banknotes.
- Visible radiation and IR sensors – both sides of the banknote are scanned six different ways, authenticating banknotes with 6 different images.
- Magnetic line sensor – a magnetic sensor can detect security features anywhere on the banknote.
- Thickness sensor – the thickness sensor can detect tapes and double banknotes.

### Other features

- Easy access to note transport path
- Dust shutter
- Serial number capture (USF-52)
